

Eat that frog!

21 Great Ways to Stop Procrastinating and Get More Done

Let me ask you something.

What is the one task you've been avoiding...

the one you know would make the biggest difference if you just did it?

In *Eat That Frog!*, Brian Tracy introduces a simple metaphor:

If you had to eat a frog every morning,
do it first thing.

And if you had to eat two frogs,
eat the **ugliest one first**.

The frog is your most important task.

The one with the biggest impact.

And procrastination begins when we avoid it.

1. The Core Idea: Do the Hard Thing First

Most people don't fail because they lack time.

They fail because they work on **low-value tasks**.

Busy work feels productive.

But it rarely moves the needle.

Brian Tracy's central rule is this:

Your success depends on your ability to focus on what matters most... and start immediately.

High performers don't wait to feel ready.

They start anyway.

2. Clarity Before Action

You can't eat the frog

if you don't know which frog matters.

That's why Tracy insists on clarity:

- Clear goals

- Written objectives
- Daily task lists

Not vague intentions.
Specific outcomes.

When your goals are clear,
decisions become easier
and procrastination loses its power.

3. The Discipline of Focus

One of the biggest enemies of productivity
is distraction.

Emails. Messages. Notifications.
They pull attention away from deep work.

Brian Tracy teaches that **self-discipline is doing what you should do, when you should do it, whether you feel like it or not.**

Focus is a skill.
And like any skill,
it improves with practice.

4. Break It Down, But Start Now

Big tasks feel overwhelming.
So we delay them.

The solution isn't waiting for motivation.
It's **breaking the task into small steps**
and starting with the first one.

Momentum creates motivation.
Not the other way around.

5. Work From Strength, Not Pressure

Tracy emphasizes energy management.
You are not equally effective at all hours.

Your most important task
should be done when your energy is highest.

For most people,
that's early in the day.

Protect your best hours
for your biggest frogs.

6. Consistency Beats Intensity

Eating one frog doesn't change your life.
Eating frogs daily does.

Success is not built on heroic bursts of effort,
but on **consistent execution of high-value tasks**.

Small disciplines, repeated daily,
create massive results over time.

Final Takeaways

Eat That Frog! teaches us that:

- Your biggest task deserves your best energy
- Clarity kills procrastination
- Action creates motivation
- Focus is trainable
- Discipline compounds over time

You don't need to do everything today.
But you do need to do **the right thing first**.

So tomorrow morning, ask yourself:
What's my frog?
And then...
eat it.
